The following is an examiner's statement of reasons for allowance: USP 6312599 at Fig. 8 describes a first BOD reactor 20B receiving influent via line 21. The effluent from 20B flows to a second stage reactor 30 at which nitrification takes place. Portion of the nitrifier-enriched effluent from vessel 30 is fed to a second BOD reduction vessel 20A. Claims 1 and 10 are distinguishable over this disclosure insofar as no activated sludge processing takes place in vessel 20A. Similarly, claim 16 requires a second "activated sludge process."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
